PROFESSIONAL SUMMARY

Systems Engineer and Co-Founder/CTO of ATLANTES SOFTWARE S.A.S with 2+ years of commercial full-stack development experience. Specializes in microservices architecture (Spring Boot), mobile development (Flutter), and distributed systems. Pursuing a Master's in Software Engineering at Pontificia Universidad Javeriana Cali. Proven track record delivering robust, scalable backend services in production environments, with strong experience in SQL databases and agile (Scrum) methodologies. C1 English proficiency enabling effective communication in international teams. Eager to contribute to high-volume, mission-critical payment platforms like those at bet365.

EXPERIENCE

Co-Founder | CEO & CTO | Solutions Architect | ATLANTES SOFTWARE S.A.S

March 2026 – Present · Popayán, Colombia

- Lead executive and technical direction of a software development company, defining technology stack, engineering culture, and product strategy.
- Designed and implemented payment gateway integrations for Looping (looping.atlantes.dev), enabling end-to-end transaction processing, balance management, and third-party provider connectivity.
- Design scalable software solution architectures for clients, emphasizing distributed systems and modular API design in Java and Spring Boot.
- Manage end-to-end software delivery lifecycle: requirements, architecture, development, CI/CD, and deployment.
- Drive decision-making on cloud platforms, microservices decomposition, and developer tooling (CI/CD pipelines, automation).
- Lead and mentor development team, fostering best practices and high-quality engineering standards.

Full Stack Software Developer | Software Mobile Solutions Ltda.

May 2023 – Present · Remote

- Develop and maintain backend microservices using Spring Boot, ensuring high availability, code quality, and adherence to clean code principles.
- Design, model, and optimize PostgreSQL databases for production systems; write complex queries and manage schema migrations.
- Build mobile frontend applications using Flutter, delivering cross-platform solutions integrated with backend APIs.
- Collaborate in Scrum teams: sprint planning, daily standups, retrospectives, and iterative delivery of production-ready features.
- Apply continuous integration practices and support DevOps workflows for deployment pipelines.
- Experience working within high-volume-change environments, managing multiple concurrent projects and evolving requirements.

TECHNICAL SKILLS

Backend	Java · Spring Boot · Microservices · REST APIs · Golang · .NET (in progress)
Frontend / Mobile	Flutter · TypeScript · React (in progress)
Databases	PostgreSQL · SQL · Database design & optimization

Messaging / Streaming	Kafka (exposure) · Event-driven architecture
Architecture	Microservices · Distributed systems · Software architecture patterns · Design patterns
DevOps / Tooling	CI/CD pipelines · Git · Agile/Scrum · Continuous integration
Languages	Spanish (native) · English C1 (Advanced – Cambridge certified)

EDUCATION

Master's in Software Engineering (In Progress)

Pontificia Universidad Javeriana Cali

January 2026 – July 2027

Bachelor's Degree in Systems Engineering

Universidad del Cauca

February 2018 – September 2025

CERTIFICATIONS & TRAINING

Diploma in Software Architecture

Universidad de La Sabana

April 2025 – June 2025

English Language Proficiency – Level C1 (Advanced)

Cambridge Language Centres – Lenguajes y Sistema S.A.

July 2023 – January 2025

Scrum Fundamentals Certified (SFC)

SCRUMstudy

May 2024

Getting Started with Deep Learning

Online Certification

February 2023

Programming and Software Development

Online Certification

June 2023
